

climate change a hot topic

Global warming is this century's biggest challenge. This hotel is dedicated to reducing its energy consumption by monitoring usage, utilising energy efficient technology such as low energy light bulbs, and by relying more on renewable energy. We also offer you the opportunity to redeem your Gold Points to offset your carbon emissions. Thank you for your support.

No time to waste

By reducing, reusing and recycling, this hotel has reduced its residual waste. Our hotels sort their waste into at least three fractions, and one third of all waste is diverted from landfill or incineration. Moreover our hotels regularly join clean up activities in the local community. Thank you for your support.

Mind your health

To provide a healthy environment we offer vegetarian meals, low-fat options, food suitable for allergic guests, as well as organic and fair trade products. We endeavour to provide healthy food options on all of our menus. Not to mention our non-smoking guest rooms, spas and exercise facilities like pools and gyms. Your choice of hotel makes a difference, even to your health. Thank you for your support.

responsible business

Charity in progress

Stay with a smile. Every time you stay with us you help strengthen our efforts to support the well-being of children through our official international charity, World Childhood Foundation, as well as locally chosen charity organisations. Thank you for your support.

Attention waterlovers!

Did you know that less than one percent of all water is suitable for drinking? At this hotel, we therefore continuously monitor and reduce our water consumption by investing in water saving devices such as water efficient showers and toilets. Thank you for your support.
